

Academic Curriculum Vitae

Jason Duran Dutton

Independent Theoretical Researcher - Castlewood, Virginia, USA

Email: jasondurandutton@gmail.com

GitHub: github.com/JasonSEFIDEFI

Research Overview

Independent theoretical researcher developing the SEFI-DEFI-GWFM unified geometric field program integrating worldline physics, identity-space geometry, dynamical invariance, quantum error correction, biological geometry, and displacement-field mechanics.

Research Interests

Unified geometric field theory; worldline physics; photonic quantum error correction; identity-space geometry; stability manifolds; DNA geometry; warp-field displacement geometry; computational physics; scientific software engineering.

Active Peer-Review Record

7 active manuscripts under review across Journal of Mathematical Physics and AIP Advances.

Journal of Mathematical Physics

JMP26-AR-02470 - Geometric Worldline Foundations of the Electron Field (Under Review).

JMP26-AR-02501 - SEFI: The Single Entity Field Interpretation - Formal Mathematical Construction (Under Review).

JMP26-AR-02666 - Unified Geometric Field Theory from Worldline and Identity-Space Invariants (Under Review).

AIP Advances

ADV26-AR-04574 - Geometric Photonic Quantum Error Correction via SEFI, GWFM, and DEFI (Under Review).

ADV26-AR-04665 - Dynamic Entity Field Integration (DEFI): A Coupled Lagrangian Construction Unifying SEFI Identity and GWFM Geometry (Under Review).

ADV26-AR-04675 - DNA as a Golden-Ratio Helical Worldline (Under Review).

ADV26-AR-04815 - Displacement-Engineered Warp Fields: Stability Surfaces and Worldline Geometry (Under Review).

Software and Computational Validation

SEFI-PY, SEFI_QEC_Stack, and the PhD Research Portfolio implement computational validation, worldline geometry, geometric QEC, and supporting workflows.

Professional Experience

Independent Theoretical Researcher (2020-Present); Underground Electrical Repairman, Paramount Contura / Alpha Metallurgical Resources; Fabricator and Foreman, Dominion Steel; Underground Electrician, Alpha Natural Resources.

Technical Skills

Differential geometry, dynamical systems, variational mechanics, quantum information, Python, NumPy, SciPy, LaTeX, Git, GitHub, scientific computing, industrial electrical systems.

Academic Contributions

Development of SEFI-DEFI-GWFM, stability manifolds, geometric QEC frameworks, DNA geometric models, displacement-field geometry, and computational validation engines.

Education

Independent Research Program (2020-2026) focused on geometric field theory, mathematical physics, quantum information, and computational modeling.

Declaration

All manuscripts, mathematical constructions, software engines, computational tools, and theoretical frameworks listed herein were solely authored and developed by Jason Duran Dutton.
