

Publication Portfolio

University of Westminster - PhD by Published Work Submission

Author: Jason Duran Dutton

Program: Unified Geometric Field Theory (SEFI-DEFI-GWFM)

This portfolio contains the complete set of manuscripts forming the unified geometric field program. Each work is authored solely by Jason Duran Dutton and contributes to the theoretical, mathematical, and applied development of SEFI, DEFI, and GWFM.

1. Core Theoretical Manuscripts

1.1 GWFM (JMP26-AR-02470); 1.2 SEFI Formal Mathematical Construction (JMP26-AR-02501); 1.3 DEFI Formal Construction; 1.4 Unified Geometric Field Theory from Worldline and Identity-Space Invariants.

2. Applied and Extended Manuscripts

Geometric Photonic Quantum Error Correction (ADV26-AR-04574); DNA as a Golden-Ratio Helical Worldline; Displacement-Engineered Warp Fields.

3. Canonical and Supporting Manuscripts

Canonical Core Warp-Metric; SEFI Space; SEFI The Big Picture; Unified Geometric Field Theory Full Manuscript; Dissertation-Scale Treatise.

4. Software Validation Artifacts

SEFI-PY Engine; SEFI_QEC_Stack; PhD Research Portfolio repositories supporting validation workflows and computational implementations.

5. Submission Identifiers

GWFM: JMP26-AR-02470; SEFI Formal Construction: JMP26-AR-02501; Photonic QEC: ADV26-AR-04574; Alternate Submission: ADV26-AR-04526-TR.

6. Declaration

All manuscripts listed in this portfolio were solely authored by Jason Duran Dutton and form a coherent unified research program submitted for consideration under the University of Westminster PhD by Published Work pathway.

7. Cross-Reference

This portfolio accompanies the Integrative Commentary, Contribution Statement, Academic CV, and Submission Metadata documents.
